Proposal Title	Bringing Ukrainian Voices to the Netherlands
Reserve Fund	Eurasia Reserve Fund
Collaborating Programs	International Renaissance Foundation (IRF), Open Society Initiative For Europe (OSIFE), Eurasia Program
Recommended by	Yevhen Bystrytsky, International Renaissance Foundation
Coordinated by	
Approver	Leonard Benardo, Regional Director, Eurasia Program
Amount Requested	$195,000 from the Eurasia Reserve
Unforeseen Need (250 words)	Ukraine signed the Association Agreement (AA) with the EU in 2014. By late 2015, most EU member states ratified the AA. A nation-wide referendum on the AA with Ukraine was announced in the Netherlands after 427,000 people backed a citizens' initiative. The No Poll movement takes advantage of a new Dutch law allowing advisory referendums. The April 2015 referendum will be the first citizen-enforced plebiscite in the Netherlands. Although the result is not binding, it will have to be considered with turnout above 30%. A YES Campaign was launched in the Netherlands with support of OSIFE/OSF. Dutch prime minister Mark Rutte announced in January that the Ukraine-EU AA is good for Europe and the Netherlands and vowed that his government would campaign for a "Yes."

Goals	Influence and shape social inclusion policies on Somalis at various governmental levels	Strengthen capacity of grassroots and community organisations to combat discrimination and strengthen civic and political participation and leadership	Promote change in culture, practice, and discourse towards Somali communities in the public and media
	- Global Diversity Exchange, Building Inclusive Cities ($150,000, 2015-2017): Creation of a toolkit that allows cities to assess the inclusion of people of immigrant background and migrants, as well as to shape policies to limit marginalisation and enable full access to rights and societal participation.	- Finnish Somali League, Collecting discrimination cases and creating awareness ($29,000, 2015-2016). Work with the Ombudsman on actions to eliminate discrimination based on cases reported by Somali Finns. - Finnish Refugee Council, Different voices, common goal ($24,300, 2015-2016). Support Somali and other immigrant led NGOs to increase their influence on policy, strengthen their practical contributions to inclusion, and enable them to form a more equal partnership with public bodies and other stakeholders.	- Nuorisoon Mediafoorumi, Faktuell, A Youth media for inclusion ($17,000, 2015-2016). Enable young people with limited representation in social and cultural life, including those of Somali and other immigrant backgrounds, to create their own media content and publish to a wider audience.
Examples of advocacy	- March 2013: Promoting findings from Muslims in EU Cities to 100 Finnish government and city officials.	- Nov 2014: Advocacy workshop with London boroughs of Camden and Tower Hamlets on developing more effective coordination between Somali supplementary schools, ensuring attainment and social development.	- Sept 2014: Interview with BBC Radio Leicester leading to a commitment by the station to improve Somali representation in the media - see Media Trust grants.

WHAT WE HAVE ACHIEVED

In the short lifetime of this portfolio, we have achieved the following:

- Obtained ownership and buy in to improve Somali integration from the Mayor of Helsinki, key city of Helsinki and Ministry of Employment and Economy officials:

The willingness to engage with OSF was evident in Finland during the dissemination phase of the Muslims in EU Cities research. Our strategies of engaging with city officials and NGOs across all the cities, during the research phase, allowed us to form relationships before the reports were released. In the case of Finland, the buy in from the Mayor's office was crucial to the implementation of the findings. A number of recommendations were incorporated into the City's 2013-2016 Immigration and Diversity Strategy. This showed that the AHIE research, published in 2013, had already had a strong impact. It also provided a guide to the development of new initiatives with the City of Helsinki over the course of subsequent meetings.

- Integrated the inclusion of Somalis into the think tank COMPAS' city led initiative bringing the inclusion of Somalis to the attention of key city political figures and officials in a number of countries in Europe:

Our research was picked up by the Centre on Migration Policy and Society (COMPAS) of the University of Oxford in a 2 year project which uses research evidence and best practice to engage civil society actors and local authorities across Europe in action oriented learning exchanges designed to foster inclusion of marginalized communities in three areas: identity, education and inclusive services.

- Created Meet the Somalis, a successful set of illustrations as a public education tool in schools:

Translating the research into digestible, multimedia friendly graphic stories to promote the research has met with phenomenal success. A key ingredient was the collaboration with the Communications Department who significantly invested time and effort into the production and pitching to the BBC and other media who are looking for new ways to tell complicated stories. This softened up an otherwise difficult subject and created pressure in the target cities for policy action and led to a broad public discussion. When they were launched, the use of illustrations for this kind of project was rare and

1 Decision Module

Decisions module is used to plan for and register decision maker's sessions, agendas and decisions. The name of this module in GMS.NET is a term used interchangeably with DM Sessions module from GMSMe. One session of a Decision Making body usually consists of several aspects: session topics (agenda), records of the decisions made and a protocol of the DM body's session.

The Decisions module is integrated with other GMS.NET modules - the Contacts, Budget Projects and Implementation modules.

A Decision Making body must be either an organization or an individual that is created as a contact in the Contacts module and marked as a Decision Maker. Thus, the Decisions module will list only those contacts that are indicated as Decision Makers in the Contacts module.

Since the DM module is part of the inbuilt workflow of the Implementation module, operational activities or applications that are put forward for decisions are displayed automatically in the Decision module (even though they are created and moved to status that requires a decision to be made (approve or reject) in another GMS.NET module – the Implementation one.

Everything they have for Serbia are excel spreadsheets for something called "Program Budvalt".

For Croatia, all they have is an analysis of MEPs from 2014.

Pic related is for Macedonia, "Development of a core training curriculum for paralegals", mostly focusing on gypsies and shit.

Italy doesn't have much, reports on the 2014 election and some research contracts.

The fuck is other pic related?

MIGRATION
Planned activities: support to meetings between European NGOs, local advocates, EU and Italian institutions; awareness-raising events, travel to relevant capitals with stakeholders, field/local visits, partnership development with relevant parts of OSF and external partners to further relevant advocacy-oriented research; continue convening inside-track group of senior policy makers (Amato group).
Link to strategy: OSEPI aims to decrease the use of detention within the EU and Italy, achieve a protection-oriented reform of asylum policy, establish solidarity and redistribution mechanisms, change the format and framing of the EU's migration policy, especially with reference to relations with countries of origin and transit.
2014-17 strategy reference: migration advocacy builds on the approach to irregular migration under "own concepts and initiatives", 4. II. p.7. Guarantee fundamental rights, rule of law and equality within the EU.
Partners: IMI, OSIFE, OSJI
Strategic or geographic changes from prior years: activities will internally given the migration crisis and a greater focus of EU institutions and capitals on the topic.

Is there any proof that this man isn't just doing what he thinks is best for the world, trying to create a progressive West more catered to minority protections and interests?
And everyone here is shitting on him because, psychologically, it feels better to believe in the existence of a confrontable, singular "enemy," rather than a disjointed handful of rising and falling self-interest groups?
The amount of zeal is huge here, but I haven't seen anything damning.

For example, the OP has posted nothing but screencaps from the previous thread. It's like there's a few, maybe a couple, people here who are actually searching for material. Everyone else is eating up whatever images get posted of "data" that seems to be interesting.
What's the point of saving up a whole bunch of images if they mean nothing, but only serve to promulgate non-evidence-based hatred?
Again, the amount of zeal is huge, and yet, there is nothing damning.

What's the matter? Is your pocket money going to be suspended? Is it due to that there are people who do it without a pay check and can do a better job than you?
Or is it due that maybe your name is also on the leak?

What would you consider "damning"?
Do you think professionals talk in plain language? Expressing their ultimate intents clearly for all to read and understand plainly?
Their language is hidden with good will, hence why it's so effective. We care for it's principle affects. Having someone pursue a cause they consider just and fair does not negate it's effects. We are not witch hunting moral characters but degeneracy that subverts our entire civilization.

The fact that people are still posting about "WHAT DOES IT ALL MEAN" proves that there isn't actually anything malicious found yet.
What is the problem with having opinions on what goes in the world, and then using the money you have to have people work to promulgate your opinion to others? Nothing is wrong with that.
If events involving death and destruction can be indirectly related to the pursuance of a cause, unless you directly connect the two, you have absolutely no proof of malicious intent on the behalf of the one who pursues the cause…
What needs to be done here would be to link PAYROLL on these documents to a recorded activity in real life, which, at the time of action, no one knew of the actor's involvement with the PAYEE.

Holy shit you are retarded, autistic, or a shill. Just because 100% of people haven't been paying attention does not mean undermining several governments, subverting elections, trying to instal pro-Soros people in Central Asian judicial and education places (like the Gullenists did in Turkey), plotting and knowing about Maidan in advance, condemning parties like FPO (which miraculously somehow had voter fraud commuted AGAINST it in the last Austrian election.), and subverting European democracy and nationhood for personal experiments with Somalis is somehow excusable.

When this hits Austrian and general European presses odds are NGO bans and the breaking of the EU will start to be accelerated. All because old king Jew couldn't be asked to understand that he was pushing his hand by asking Europeans to erase their nations and posing a greater existential threat on them than the Soviets ever did.

"Controlling the world's sources of news, Jews can always prepare the minds of people for their next move. The greatest exposure yet to be made is the way that news is manufactured and the way in which the mind of whole nations is molded for a purpose. When the powerful Jew is at last traced and his hand revealed, then comes the ready cry of persecution and it echoes through the world press. The real causes of the persecution (which is the oppression of the people by the financial practices of the Jews) are never given publicity."

Yes, you are right, but Soros and Open Society does not give a fuck about how fucked nigger countries are, he just wants to import them to Europe/increase their number in America. He is for subversion of Europe and Eurasia/Former Soviet Union, trying to "strengthen human rights and minority culture" even inside of places like Kyrgyzstan. This means simultaneously funding Wahabbism and third wave feminists and gays. I know for a fact they tried getting Kyrgyz-Americans and faggots to teach in the American university of Central Asia to promote liberalism Soros style. I know because they told me I couldn't get a grant because my writing on ethnic federalism in Russia was too positive. They told me I didn't share the values of the program.
Anyway, yes, he has been manipulating politics overtly and behind the scenes. He wants to erase Europe and make it like America, no ethnic identity, just transitional ones like white/sudlander. He does not understand he'll create more nazis that way.

Weird vortex in the Gulf of Aden, there's a massive naval presence in the Gulf that "Somali pirates" were false flagged as a justification for. Wikileaks has never bullshitted, and apparently as soon as this leaked they were hit with their biggest ddos attack in their history. Something weird is going on in the Gulf of Aden, they're calling it a vortex and it's fucking up the jet stream and killing a bunch of fish. If they're relocating tons of Somalis from the coast, I would think it's because there are going to be military installations built in their place.

>Jews have played a very long game, longer than most Goyim can conceive. They have patiently waited 2,000 years to get to this end-game stage and Christianity was a crucial tool to get here jumping from paganism to "open the borders, all are brothers, turn the other cheek" wasn't possible.
This is really dumb.
Jews are a problem because they have a biologically based tendency to evaluate actions in terms of "is it good for the Jews?"
They have a cultural heritage that justifies doing lots of bad stuff to goyim so long as it is "good for the Jews"
And the Ashkenazim (and to a lesser extent, the Sephardim) have centuries of experience working as elites in European societies where they constantly get to act in ways which are "good for the Jews", and bad for the goyim.
A lot of this is just an emergent thing from lots of individual actions, but anywhere they are particularly numerous in elite roles, they can get together and come up with a plan that is "good for the Jews", and coordinate to execute it.
But the idea that 2000 years ago Jews were making plans that would take 2000 years to pay off is bullshit. 2000 years ago most Jews were convinced that a Messiah would come along shortly and smash their enemies into dust, and several very large groups of them rebelled (and lost) in an attempt to do this.
The Jews in their current forms are mostly the end result of the massive failure of the Messianic idea, and them being totally BTFO by the Romans when they tried to execute their plan.
Did some Jews 2000 years ago think that the increasing numbers of Greeks showing an interest in Judaism was "good for the Jews"? Undoubtedly.
Did they have a long term plan to transform the totality of their enemies' societies? That's fucking crazy and gives the Jews way too much credit.

Jews as an extractive elite is the end result of the failure of their previous strategy, which was an isolationist cult focused on eventual military victory which they believed was ordained by God. They weren't extractive or manipulative in Roman times. They were renowned for being devoted to their traditions and strongly resistant to change.

>60 people own half of the worlds wealth

>or even more

So going on from this fact, from this tidbit of knowledge…we got to see what one of these people does to the world with his money.

He literally funds millions of people around the planet.

that leaves the question as to what the other 59 people are doing with their wealth.

That may be the real iceberg and soros may be the unlucky outcast who got exposed by them if that is true…though I kinda doubt it.

well to the jews it may sound like a reasonable thing to label their nature as so.
The "god" that they think exist is but reality. The strong white hands that manipulate reality are but another manifestation of it.
But at the end of the day, it does not encompass their driving force in their parasitic souls. Their nature does not rest in words or in reason alone. Their nature always will just rest in nature alone, in how they evolved. In their DNA. That is why so many secular ones of them still act like normal jews.
The not following of gods (realities) rule is akin to the mysticism of the right wing volk. They are just crude manifestations of the nature of the men. Through shaky, and ever evolving language biological systems that we call consciousness and language.

Think more globally and more grander. This man alone employs literally millions of people on this planet. He basically is a mega corp.
So to go of on this logic, if he is one of these many super rich people with an agenda. What if there are also others like him still who do the same?

Why is only he getting exposed when its obvious that there are many other rich parties out there who could be doing the same?
Logic has nothing to do with your notion of red herrings or whatever dumb low IQ plebian stuff you can think off.
Neither does it make him less guilty and makes these leaks less troublesome.
But you asked if this was a tip of an iceberg. Well perhaps it is. Perhaps there are even higher jews and if we are lucky, non jews doing similar things.

seriously though
>liberals complain all the time about 10 people, 60 people owning more than the half of the worlds wealth
so using their own logic against them
>soros is one of these people who has a lot of wealth
>it is proven that he uses this wealth to further increase his wealth and to fund political movements and evil things to change society
so to logically deduct from all of this
>the other wealthy people who own a lot of wealth, could be doing the same thing as soros
The only thing that is lacking, is more evidence.
But I feel like even with one of the heads of this elite, and how they operate, we are entering the most dangerous of dangerous territories.
I wouldnt be surprised if there was a "surprise" explosion (aka cruise missile) on the server farm where 8ch.net is hosted if we dig even deeper.

Staunch promoter of multiculturalism for Australia, says multiculturalism is bad for Israel
Isi Leiber on Australia: "There is a need to sit together and establish a way in which Australians can recapture that spirit of multiculturalism which I think we are all proud being part and parcel of."
Isi Leiber on Israel: "Multiculturalism has no place in Israel."
Isi Leiber is an internationally known Jewish leader and former chairman of the board of directors of the World Jewish Congress and the former leader of the Executive Council of Australian Jewry. He was major proponent of multiculturalism, open borders, and cultural Marxism in Australia. He moved to Israel in 1999 and still advocates multiculturalism for Australia while advocating nationalism and homogeneity in Israel at the same time.
In 2012 he wrote this article explicitly praising the decline of Australia homogeneity. He gloats that Australia is no longer "exclusively white and primarily of British origin." Leiber praises the downfall of the "racist exclusionary" White Australia Policy.
However, Leiber is now living in Israel and showing shocking hypocrisy. He writes article for the Jerusalem Post about the horrors of multiculturalism in Israel. He recently wrote in the Jerusalem Post that "this is a country which was set up and created as a Jewish country for the Jews." Leiber has also stated "multiculturalism has no place in Israel."
Isi's wife Naomi is the president of Emunah, a Jewish women's organization. She says that "assimilation and intermarriage" are the "greatest threats to world Jewry."
Isi Leiber loves multiculturalism. Except he also really hates it.

I wonder how much faster we can accelerate. How long till we reach the mythical "the jews now feel uncomfortable and start to shift their hand to the button to the nukes on their 5 hidden submarines" limit.
Are we on 2% to that? Are we on 20% to that? Because if the jews get on that level, the whole world will. So right now its weird but their frustration and the frustration of lack of power and weird events (to them at least) will resonate with the frustration of other nations. Meaning that there should be a generic pulse to feel on the whole world average?
at least I hope so.

perhaps he gets enough shit through other things? Meaning that he does not always use his own destruction to play with the market? But often just does destruction for its own jewish sake?
But in some things, like BLM, or even brexit, where he sees to make an opportunity to make a buck while doing both of his favorite things, he will do so.
he also just plays with the market that is completely disconnected from his destruction. So he probably manages to level his efforts and desires in this world pretty well with one another. Min maxing where he can.

Hence why the russian jews are now so opposed to him.

Soros Groups Get Hacked, Hundreds Of Documents Leaked
http://dailycaller.com/2016/08/13/soros-groups-get-hacked-hundreds-of-documents-leaked/
>There are documents dating from at least 2008 to 2016. In June, the Open Society Foundations also had several documents leaked by DCLeaks. Bloomberg reported that the foundation notified the Federal Bureau of Investigation to the hacking.
>Documents in the leak range from research papers such as “SOMALIS IN EUROPEAN CITIES PORTFOLIO REVIEW” to specific financials of grants.
>DCLeaks previously released emails from Air Force Gen. Philip Breedlove, the supreme commander of NATO forces in Europe. The emails showed Breedlove upset with Obama’s reluctance to address Russian aggression.

http://www.bloomberg.com/news/articles/2016-08-11/russian-hackers-of-dnc-said-to-scoop-up-secrets-from-nato-soros
>In the case of Soros’s Open Society, hackers stole a trove of documents after accessing the foundation’s internal intranet, a system called Karl, according to a person familiar with its internal investigation. On August 3, the DCLeaks.com Twitter account tweeted “Check George Soros’s OSF plans to counter Russian policy and traditional values,” attaching a screenshot of a $500,000 budget request for an Open Society program designed to counter Russian influence among European democracies.

there are many of us here who can rev up proxies to shitpost it on halfchan. There are usually something like 50 of us. Have they not woken up yet?
There is a sister site that I often frequent that is pretty much our reddit equivalent. Voat.co and the leaks got as much as 300 upboats…most news articles over there dont get as many…so its pretty popular over there as well.

European news media outlets…perhaps not. But we do have youtube celebs…molly, that nigger pigeon fagget and a bunch of other cucks and fags that we can share it to.
I am not helping that much because usually others do all of this already, since we are not alone in this effort.
But yea, the flow of things is alt right allies (youtube faggets, bloggers), then perhaps some of the reviewers of the leaks, RT, and then perhaps even further to locally independent news stations?
I am dutch so I could try to inquire about them here but I would be starting off from zero. Surely there must be others who already are good at this.

dont forget to be slightly skeptical of this, I dont mean that we shouldnt spread it, but we also should seek out peer review. As this is a relatively new theory…so to speak. With peer review, it will become more legitimate. If we rush too fast and it turns out to be a kike plot, it may backfire on us for being too enthusiastic.
So spread it to them and tell them how you acquired it. They will may need to know how it came into existence for their own reputations sake.

Overview of Board Meeting Agenda

Some of the most exciting work to promote open society here and around the world is made possible through new technologies. We have put together two panels for the Board meeting that focus on the many ways that technology is being deployed to advance our work in U.S. Programs. Technology – through the Internet, text messaging, video games and other tools – provides a new forum for organizing and outreach. Technology also offers an unprecedented platform for government transparency and democratic discourse. Six experts from a range of fields will join us to demonstrate some of these tools and to discuss the opportunities and limitations of technology to advance open society. How can organizations built online exert offline political power? Will increased access to government information lead to real reform? How do we protect and promote the use of the democratizing power of new technologies by everyone, especially traditionally underserved populations?

Our first panel on Wednesday, March 4th, ***Technology and Advocacy: New Strategies for Organizing and Innovation***, will consider how technology is being used to advance OSI issues through organizing, activism and social movements. See Tab 4. Panelists will discuss and demonstrate case studies that include video games to raise awareness about immigration reform and Guantanamo detentions; innovative online organizing and media campaigns at the state level; and people of color led organizing online to spotlight issues like criminal justice, Katrina accountability, and confronting voter suppression.

Sherrilyn Ifill will moderate the panel, joined by Heidi Boisvert, Multimedia Manager at Breakthrough; Bobby Clark, Executive Director, ProgressNow; and James Rucker, Executive Director, ColorofChange.org.

If you want to weaponize these leaks effectively, for each European country, someone needs to prepare a dossier on all of the Soros activities there, along with links and whenever possible faces and names. This can be sent directly to media or to nationalist groups in those countries. Specific, actionable intelligence for media and nationalists to work on will put serious pressure on Soros' links on the ground and seeing people being dragged through the mud for their crimes will dissuade further recruitment.

I've had to sit and watch in despair as my SNP, the party whose moral compass was aligned with staunch, traditional, Outer-hebridean Presbyterianism, was infiltrated and subverted by a clique of SJWs, feminists and Marxists. They latched onto the Indy movement i've advocated for my entire life and made it synonymous with anti-nuclear, pro-EU, pro-immigration, open borders, destroying it and any chance of it succeeding. How they expect to carry the whole country when their battle cry is 'no more Tories!' is a complete fucking mystery, yet they persist. It's historical and goes back to the proscription of Siol nan Gaidheal and the 79 group-one of the groups was allowed to return and they've assumed power. I've washed my hands of the SNP now, they're no longer Nationalists.

From the Soros Leaks, Europe folder: -Europe-OSI Brussel EU Advocacy calendar-European Elections-populism in the ep implications for the open society proof.pdf

EXPE 961768 — Initial — QA: RM

12 *H. Grabbe and N. Groot*

What can supporters of the open society do?

The open society needs much more public defence from its many quiet supporters in Europe. Protection of rights, freedoms and diversity can no longer be taken for granted by all Europeans who have enjoyed the last quarter-century of peace and tolerance. Problems are growing that can no longer be dismissed as passing phenomena caused by the economic crisis.

There are five areas on which concerned Europeans can focus their efforts to pull energy away from blame and fear into positive action to reform the EU and improve the inclusiveness of European politics:

(1) **Limit racism in the public debate.** If many more xenophobic populist MEPs start using the European Parliament to broadcast hate speech, the rise in racist rhetoric will also have an impact on broader political discourse. The European Parliament could use its rules of procedure to make it harder for populist parties to use political debate as a medium for hate speech and incitement to violence, if chairs were to object openly to such behaviour during debates.

Here's something I found:
TL;DR: We need to label criticism of the EU as "hate speech" and ban it.

helping Ukraine without using sanctions on Russia. The US sanctions should involve the freezing of the dollar denominated assets of Russian banks and the strategic release of reserves to depress the price of oil for the next 90 days or until the Russian government recognizes the elections in Ukraine and accepts the results. This will be the strongest deterrent in GS's opinion because the ECB would not freeze assets so there would not be a complete collapse of the Russian markets but there will still be tremendous pressure exerted.

they are not exclusive enemies of eachother though anon. The reason why they are enemies to eachother right now, is because they have communally removed the white man opposition.
So like a dog that finally has caught the ambulance that it was chasing. They dont know what to do. They go like "ugh…shekels?…ugh who the goym now….? YOU fellow jew, you look like the goym, gonna treat you like one…filthy impure goym blood"
and then the murder, and evil nature resumes just fine again.
There is a reason why they are parasites by their primary nature. They cannot exist as a dominant force because they are as immutable as all the other races, in their nature.
Sure, some of them still have some lingering thoughts on how to kill all goym, and how to get that israely temple and make slaves of all of us…but little do they know that through their success, they have changed their own variables that make them successful. They too became part of the cyclical nature.
So some of them got enough IQ points to realize this, as the russian jews, and try to make the goym return to their healthy state of mind…so that they can exist once more.
What a pitiful state these wretched creatures are in.

Objection 3.1: But Trump wants to discriminate based on religion!

Persuasion: Clarify to the subject of your persuasion that Trump only wants to discriminate against non-citizens. That is literally the job description of a president.

For context, point out that Islam is unique among religions in that it includes an order from God that Muslims should overthrow any government that is not compatible with Islam. Moderate Muslims around the world ignore that part of the religion, but refugees are coming from places where it is considered mandatory.

I don't think other religions have a mandatory requirement to overthrow the government. So comparisons to other religions are nonsense. And the job of the president includes knowing when to make exceptions.

If you think we can screen Muslim immigrants well enough to stop all of the terrorists and future revolutionaries, just think about any job in which you had coworkers. Remember how incompetent some of them were? Those are the types of people screening immigrants. Does that feel safe to you?

well, knowing that jews are still kinda humanish, many of them even openly atheists, so basically at best they are still kinda like whites, only on average more smart. Thus on average also more psychopathic, but on average thanks to their nature also more evil. Many of them also have genetic illnesses, which may result in aberrant thinking.

So without the pressure from the white variables making them more inclined into nepotism, and distance, and ancient infighting…there is a small possibility that they may actually be quite hostile to one another.
As it would be without reason that they openly hate upon eachother, and openly attack eachother in various forms.
As a natsoc guy this type of event is still not desirable, as we should be on top of all of this. But perhaps some of them are finally realizing that their parasitic nature cannot exist as a dominant trait for the entirety of society.

November 2nd, 1917.

Dear Lord Rothschild,

I have much pleasure in conveying to you, on behalf of His Majesty's Government, the following declaration of sympathy with Jewish Zionist aspirations which has been submitted to, and approved by, the Cabinet.

"His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country."

The concept of Globalism was birthed by Adam Weishaupt over 200 years ago. Since then, adherents to this ideology have grown more powerful and more influential over the decades. There are "Dynasty Families" who largely control most of the mass media, Hollywood, commerce and Governments. There are only a handful of these Families, and everyone else are either their assets (liberals like soros), their disposable pawns (corrupt people in power like the clintons) or their enemy (nationalists like trump).
Half of 1% knows the full truth/agenda. These are the Rulers.
Half of 1% knows nearly all the truth, but certain details are withheld.
90% of all Globalists are promised to have full knowledge, and that they'll be safe/wealthy as a result of Globalism. They're pawns.
5% thinks Globalism will result in good, and their motto is "for the greater good!". They are kept nearly entirely in the dark about the real agenda and method.
2% of Globalists are "useful idiots." The MSM, liberal population and others who are passionate about their liberal views, but have no idea what will actually result from them.

How is it in our interest when people that do not share the culture and have zero education, mostly young men, get flooded into our nations?
I think there is a high chance that he is doing what he thinks is best, but then again it is not in our interest. None of that globalism shit is.
When europe and the western nations get into trouble you will have trouble holding up that "enlightenment" values that you like to shill for so much. Which means you are acting contrary to them. If you look at the population development of africa, it doesnt matter how many you take into europe they will only get more and more. So in a way if you want to argue in that prespective it is better to keep europe and its nations stable and propserous so they have the motivation to help out africa than to flood it with unwelcome immigrants.
But then again, all the high level intellecutals like to rant about capitalism and other shit, which is an easy thing to do from a moral perspective (and i do not like capitalism in its current form, i absolutely hate it) but then when it comes to the hard part critizing the immigration policies and the problems that are derived from that you take the easy route and appel to enlightenment values to justifiy your retarded bitch ass opinion.

You retards should stop refering to who is a pawn and who isnt. THey developed certain belief systems that naturally will occur in a certain environment, just like /pol/ does.
In a way globalism is just a foresight of what is somehow "inevitable" and they try to construct their ideology, ofc with them having their interests in mind. Also take into consideration that those people are super wealthy and i cannot assume that making more money without having a idealistic plane of motivation is their only goal. So the derive this ideological plane and they are not passive like all the millenial beta subhumans that naturally will occur given the right petri dish.

Now that is a retarded pattern. Pattern goes like this: advance globlalism, advance globalist ideas influx of immigrants, weakening of social cohesion of native population through demoralisation and private interests. Get immigrants in, problems evolve, try to mitigate problems, fall back on ideology to not touch the holy grail of globalism, devise globalist mitigation strategies fueled by idealism and a pragmatism. See it is not working, bribe officals to continue to maintain a retarded system.
Ideological systems always evolve through necessity, merely never out of deep thought.

And in a way to avoid distraction, george sorros is really juicy and the way he thinks he has his fingers in anything and other like minded people do the same as him in the same position. Georgy boy is a bit more motivated according to his history.

But to make it simple the whole immigration thing is nothing but a distraction so they can soak up all the wealth, it is tranished through certain mechanics that will evolove once the problems arrive. So people have to deal with this problem and these problems are a lot more emotionally binding than other basic shit. It is easier to hate people than a system. And then you got all those psyducks that tell you otherwise. What you fags need to do is to spread that information, and dont dwelve into tinfoil head shit because even it is correct it is useless and counterproductive. And that is the essence of conspiracy theories, unproven disected train of thoughts. What is important is how the current ideology and mechanisms shape our persections and and the way we experience reality. It is like a trojan horse, like a virus it is the magic of the psyducks that are used to distorted your perception. Because all persuation comes form a shapng perception and all that comes along with it, all the information you read on the internet and all the ideas that get introduces while leaving out the basic things. Guys, i digged deeper into the russian rabbit hole. And what i found is this, the organization known as "cyberberkut", that works undercover in ukraine, actually gained access to many of those documents at June 1 2015. I even found a russian strategic plan there, which is also available at the archive:

http://www.cyber-berkut.org/docs/Russia+-+2014-2017+Proposed+Strategy.pdf
Those guys have a lot of other leaks:
http://www.cyber-berkut.org/traitors/
About the date, they hacked Poroshenko computer June 1 2015:
https://archive.is/DuDbT
"Хакеры опубликовали документы с сервера президента Порошенко, в которых содержится «стратегия» работы по Украине."
That included many files you see in your leak available in Eurasian category, but mostly strategies how to work on Ukraine.
I have feeling they are connected to those leaks.

There are a lot of demoralizing shills and concern trolls here, who likely do not understand why such policies/advocacy is bad because they believe it to be morally justified. Make no mistake though, this man and what he stands for will destroy cultures and countries.

First he shakes moral ground, then raises the generation of leaders loyal to him and to the jewish mafia that above him. helping Ukraine without using sanctions on Russia. The US sanctions should involve the freezing of the dollar denominated assets of Russian banks and the strategic release of reserves to depress the price of oil for the next 90 days or until the Russian government recognizes the elections in Ukraine and accepts the results. This will be the strongest deterrent in GS's opinion because the ECB would not freeze assets so there would not be a complete collapse of the Russian markets but there will still be tremendous pressure exerted.

Yes, yes funnel the youth natural tendencies to autoaggressive behaviour and then use your priests to advocate self interest that isnt really self interest. Yes this is how that shit works, because we want an open society, but what we really want is a defenseless democracy that gets guided by our advice and those of our ngo shit. And then we have some opposition that isnt smart enough to regocnize this and will say the same shit just in a different scale. Because that is how we conduct our retarded shit, persuade influance change.
